

Vegetation Maintenance Notification

Date _____

Some of the trees and tree limbs growing within the right of way easement on your property have grown too close to the overhead power lines.

BEFORE SIDE TRIMMING

If the trees are able to brush against the power lines and provide electricity a path to the ground, there is a potential fire and safety hazard for you and your family. It's also possible that electric service could be interrupted to your home and to your neighborhood. The

trees and branches should be cleared away from the power lines now while we have a crew in the area.

Please respond by checking the appropriate box(es) on the back of this card, date it and sign your name. Then hang it on your door-knob or gate.

If you'd like to discuss the vegetation maintenance in more detail, call the number listed below, or fill in your name and phone number and we'll call you.

AFTER SIDE TRIMMING

If this is not your property, please write the name and telephone number of the owner in the space provided.

In the event that you are unable to place this card back out to be retrieved the next day, please call the co-op's Vegetation Management division during weekday business hours with your comments or questions. **Thank you for your cooperation!**
